The Single Plan for Student Achievement (SPSA) is a plan of actions to raise the academic performance of all students to the level of performance goals established under the California Academic Performance Index. California Education Code sections 41507,41572 , and 64001 and the federal No Child Left Behind Act (NCLB) require each school to consolidate all school plans for programs funded through the School and Library Improvement Block Grant, the Pupil Retention Block Grant, the Consolidated Application, and NCLB Program Improvement into the Single Plan for Student Achievement.

## Part One: Analysis of Verifiable State Data, including the API, AYP, and the California English Language Development Test

The purpose of this section is to gather data about your school right now. You then use that information to determine goals and actions. You can include a school profile which gives background about your school and provides context for the plan.

The School Profile

## Data Collection and Analysis

Review your student achievement data, and other sources of information regarding current conditions. This step is IMPORTANT! Review data with key stakeholders including teachers, Leadership Team, Site Council, ELAC, etc. Your goals and actions should be based on an analysis of student achievement data.

For the plan, provide charts of student achievement provided by Key Data Systems and Illuminate from the CST, CELDT, CAHSEE (as appropriate).

## Part Two: Addressing the Performance Gaps

The purpose of this section is to set priorities and specific goals. Your priorities are based upon the synthesis you developed above. Your goals flow from these priorities.

Note: CA regulations state that the SPSA must address how funds will be used to "improve the academic performance of all students to the level of the performance goals, as established by the API." Also, regulations state that "The SPSA must align with the local educational agency (LEA)."

## Select Priorities

Based upon analysis of data, prior school goals and district goals, set priorities or focus areas for your plan.

## Write/Revise School SMART Goals

School goals flow from your priorities and should be attainable in the period specified in the plan, specific to the student participants and measurable. Goals should be listed in SMART (specific, measurable, attainable, realistic, and timely) format but also align to the outcomes expected under the state and federal accountability model.

## Part Three: Analysis of Proven or Promising Strategies

While the justification for your activities need not be written into your plan, best, evidence-based practices should be reflected in your action plan and activities you pursue. Once a goal for student achievement has been identified, the leadership team needs to determine how to reach that goal. Choose specific strategies that are likely to work and align to the district's Local Education Agency Plan as well. Be deliberate in what strategies you choose. Consider:

- Did it work for a similar school?
- When do you expect to see results?
- Can you explain why you expect it to work?
- What will you do to ensure that it works?
- At what point will you determine it isn't working and stop doing it?
- Identify current successful practices in the school and district by looking at data, talking to colleagues, and seeking input from such professionals as curriculum specialists.
